SUMMARY

Curious and creative developer with a strong foundation in C#, JavaScript, and SQL, passionate about solving real-world problems through clean and intuitive code. From redesigning enterprise systems to building impactful tools like Starbucks' shelf-life tracking app, I bring ownership, attention to detail, and a results-driven mindset to every project. Proficient in React, ASP.NET, Azure, and mobile development, I thrive on turning challenges into opportunities to learn, grow, and deliver solutions that make a difference.

WORK EXPERIENCES

Junior Software Developer & Data Analyst

Aug 2022 - Aug 2023

Manse eSolution Inc.

Fergus, ON

- Supported the development of a grain elevator management system used by 80+ clients across Ontario to track grain movement, from truck intake to storage and release.
- Transformed a static Google Maps view into an interactive customer management tool using Delphi, enabling users to select multiple clients on the map, view full lists, and perform bulk actions like group emailing and batch edits via drag-and-drop improving operational speed and reducing manual processes.
- Wrote and optimized complex MySQL queries, including multi-table joins and condition-based updates, to maintain real-time accuracy across ticketing systems that recorded incoming and outgoing shipments.
- Managed and cleaned large-scale client data, resolving inconsistencies in high-volume grain inventory tables leading to a 30% reduction in query resolution time and smoother database operations.
- Designed and implemented custom Crystal Reports to meet diverse client needs, helping operators and managers make faster, data-informed decisions.
- Improved the system's UI/UX to reflect a more intuitive and professional interface, drawing from design sensitivity honed during prior creative experience.

PROJECTS

Starbucks Partner Support Shelf-Life Tracker App [Github](#)

Oct 2024 - Present

- Developed a mobile application using React Native and C# ASP.NET Core to assist Starbucks partners in tracking product shelf-life dates effectively.
- Designed and implemented a search feature with RESTful APIs for quick product lookup, reducing manual calculations and errors while achieving an average response time of under 200ms
- Created a custom widget for iOS and Android platforms, enabling users to instantly access expiration dates without opening the app, significantly improving usability and saving time, resulting in a 20% increase in user engagement.
- Leveraged Azure App Service and SQL Server to ensure scalable deployment and cloud-based storage solutions.
- Integrated time zone conversion to deliver accurate shelf-life dates globally, ensuring 100% time zone compatibility across regions.

Initiate News Mobile Application [GitHub](#)

Jan 2024 - Apr 2024

- Led a team of three developers through a four-month project lifecycle, from initial concept to successful deployment, ensuring on-time delivery while meeting all project milestones.
- Designed and implemented the front end using Kotlin to create a seamless and intuitive user experience.
- Developed efficient and secure RESTful APIs in C# to handle data communication between front-end and back-end systems.
- Strengthened app security by integrating Firebase for OTP authentication and reducing unauthorized access risks.
- Integrated the ChatGPT API to generate keyword news summaries from lengthy articles automatically.

Virtual Game Store [Github](#)

Sep 2023 - Dec 2023

- Developed a comprehensive virtual game store application using ASP.NET Core MVC, enhancing functionality and delivering a streamlined user experience.
- Designed and implemented both front-end and back-end features, including user preferences, wish lists, and game downloads, ensuring seamless interaction across all components.
- Tested the app alongside the team to ensure every feature worked flawlessly, utilizing Selenium to automate the process and guarantee smooth and reliable functionality.

MANAGEMENT

Starbucks Partner Support Shelf-Life Tracker App

Oct 2024 - Present

- **API Management:** Handled 1,100+ daily calls with 217ms average response time and 99.6% success rate.
- **Exception Handling:** Monitored via Application Insights, ≤0.4% failure rate due to transient network issues.
- **Azure Infrastructure:** Manages App Service performance tuning, backend updates, and real-time monitoring.
- **User Engagement:** Improved usability with iOS widget enhancements, achieving a 20%+ engagement increase.
- **Field Testing:** Conducted live tests with Starbucks partners and implemented regular seasonal updates.

SKILLS

React / React Native

- Built and deployed mobile apps, including Starbucks Shelf-Life Tracker with custom iOS/Android widgets to enhance usability.
- Developed a personal portfolio website to showcase projects and technical skills.

Kotlin

- Developed and deployed mobile apps, including Initiate News App and custom native widgets for efficient user interaction.

ASP.NET Core / C#

- Designed scalable APIs for mobile and web platforms (Starbucks app, Initiate News App, Virtual Game Store), supporting thousands of daily users.
- Implemented Layered Architecture (Controller, Service, Repository) and adhered to Clean Architecture principles for maintainability and scalability.
- Ensured secure data handling and efficient cloud integration with SQL Server and Azure.

SQL / MySQL / RDBMS

- Optimized multi-join queries to manage large datasets for 80+ clients in Manse eSolution Inc.'s Grain Management System.

Data Modeling / Database Design

- Designed scalable schemas with at least 5 relational tables per project, including Starbucks and Initiate News App.

Cloud Deployment (Azure)

- Deployed and currently maintain live mobile applications using Azure App Service and SQL Server integration.

Version Control (Git)

- Managed feature branching, code reviews, and CI/CD pipelines using Git for collaborative projects.
- Proficient in Git workflows, including pull requests, rebasing, and resolving merge conflicts to maintain clean repositories.

EDUCATION

Computer Programming and Analysis (Co-op), Advanced Diploma

Sep 2020 - Apr 2024

Conestoga College, Waterloo, ON
